Lampeter Dairy Champions

CHAMPION COWS IN THE HOLSTEIN AND GUERNSEY judging at the Lampeter Fair are exhibited by their owners. Nearest the camera is the Guernsey of Rohrer Witmer, Willow Street R2. The Holstein was shown by J. Mowery Frey, Jr., 1717 Hans Herr Drive. L. F. Photo.

Only One Repeat Champ In Lampeter Dairy Show

Only one grand champion repeated last year's performance in the Lampeter Fair Dairy show at the Lampeter Community grounds Thursday

Rohrer Witmer, Willow Street R2 showed Mac Dag June Sophia a four-year-old to the purple rosette of the guernsey division for the second consecutive year Dorothy Garber, Willow Street R2, took reserve championship honors with a junior calf.

J Mowery Frey, Jr., 1717 Hans Herr Drive, showed Oakton B B Mistress Jo, a five-year-old New York bred Holstein cow, to the top spot of the black and white division of the show J Robert Hess, Strasburg R1 repeated as the reserve champion winner in the breed competition Junior champion in Holstein compe-

(Continued on page 4)

Lampeter Fair Beef Show Is Won By Larry Weaver

A 16 year old Future Farmer with a penchant for giving steers unusual names showed his 925 pound angus to the grand championship of the West Lampeter Fair beef show Wednesday night.

Larry Weaver New Holland R1, son of Mr and Mrs Lester Weaver, best out all competition with "Pap" to score his second grand championship in as many years Last year at the New Holland Fair Larry took the purple rosette with an Angus named John Nolt

The West Lampeter champion which was bought last year at the Garden Spot feeder calf sale from a consignment by S. K Shotsberger's farm in Lebanon county, will be entered as a summer yearling in the Pennsylvania Livestock exposition and the Eastern National Livestock exposition at Timonium, Maryland

Reserve champion, a Hereford, was shown by Dorothy Groff, 15, a 4-H club member from Lancaster R7. The 1100 pound white face, named Pol-

New Holland Future Farmers To Fly To National Convention

The seven seniors in vocational agriculture at the New Holland High School along with their teacher, will fly to the national convention of Future Farmers of America at Kansas City next month as the guests of the New Holland Machine Company

The Future Farmers will fly in the company's private plane

Other county Future Farmers attending the convention will include Paul Trimble, Quarryville R1, and Clarence Bauman, Lancaster R7, state FFA officers, Harold Brubaker, Mount Joy, state champion FFA dairy judge, and Jerry Breneman of Penn Manor High School, third place in the state FFA livestock judging contest

Farm Calendar

Oct. 1—Deadline for entries in the Pennsylvania Livestock Exposition

Oct. 1—Deadline for entries in the Eastern National Livestock Exposition.

Oct 2, 3, 4—Northeast Poultry Producers Council (NEPPCO) annual meeting in Harrisburg

Oct. 3—6 30 P M —Baby Beef show at Manheim Farm Show.

8 p.m —County and Western Music on the stage at Manheim Farm Show

8 p.m —County 4-H Beef Club meets at Lampeter School.

Oct. 4—1 P M —Swine show and Steer show at the New Holland Fair

11 a.m —Dairy judging classes at the Manheim Farm Show.

7 p.m.—Parade at the Man-

(Continued on Page 10)

Three Calves Are Awarded To Future Farmers

Three dairy cattle breed associations presented purebred calves to as many Future Farmers Friday morning at the West Lampeter Community Fair.

The Holstein-Friesian calf, out of the herd of John J. Herr, Mount Joy R1, was won by Stanley Graver, Gypsy Hill Road He is a student at the Lampeter - Strasburg High School.

Shoemaker Brothers, Kirkwood R1, supplied the Guernsey heifer won by John Campbell, Box 57, New Holland John is a student in vocational agriculture at the Garden Spot High School

The Ayrshire calf was furnished by David Harnish, Quarryville R2, and won by Thomas Zartman, Ephrata R1, a 9th grade student at the Ephrata High School

The boys won the calves on the basis of a written application of the three bred associations They agreed to raise the heifers under the supervision of their teachers of vocational agriculture and sell them only in order to further their educations.

Earl Livengood Wins Lampeter Swine Show

Seventeen year old Earl Livengood of 1648 Morningside Drive, Lancaster, swept the market hog division of the West Lampeter Fair Wednesday Top award in the breeding swine division went to John Stoner, Strasburg R1, for his aged Yorkshire sow

Livengood, who farms with his parents, Mr and Mrs Phares Livengood, took the pen-of-two classes with two heavyweight Yorkshires averaging 257 pounds, and the pen-of-

Four Countians Will Judge At NEPPCO

Four county youths will represent 4-H and FFA next week at the annual meeting of the Northeast Poultry Producers Council in Harrisburg

Competing with 11 other state teams from the Northeastern section of the United States in the 4-H poultry judging contest will be the Lancaster County team of Roger Stoner, Robert Hoover, and Kenneth Dombach state winners at the Pennsylvania 4-H judging days earlier this year Assistant county agent Winthrop Merriam, is coach of the team.

Carson Kauffman, Willow Street R1, a member of the Future Farmers of America

Wesley Mast In Clean Sweep At Ephrata Fair

Wesley Mast, Elverson R1, showing a flashy 950 pound Angus steer took all three top awards at the Ephrata Fair Beef Show Thursday night

The Kinloch Farms-bred black was tapped for grand champion of the show and strutted his stuff to help Wesley collect the fitting and showing awards as well

Nancy Frey, Marietta R1, had her reserve champion, a Hereford, fitted well enough to place next to the champion in the grooming class as well as the type judging.

Gerald Hess, a former 4-H member from Elizabethtown and now assistant county agent in Northumberland County, was judge of the event His job was complicated by the heavy downpour which forced the showing inside to the tie up area of the Keller building The 15 Angus and eight Herefords competed for standing room in the hotly contested showmanship contest

Following are the placings in the show

ANGUS

1. Wesley Mast, Elverson R1, 2. Mae Mast, Elverson

Rabies Outbreak Noted In Two Penn'a Counties

HARRISBURG — Two Pennsylvania state agencies, the Department of Agriculture and the Game Commission, joined today in a combined effort to wipe out a persistent rabies threat in two northern tier counties where fourteen cases have been reported since last January 1

Officials of the two agencies said foxes, skunks and raccoons were known carriers of the disease and were believed to have transmitted it to domestic animals in Bradford and Tioga Counties.

Bradford County known cases have included three cows and three foxes. In Tioga County, the disease has been found in three cows, three cats, one dog and one fox. Neither county reported a rabies case in 1961.

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average two to seven degrees below the normal range of 52 at night to 72 in the afternoon. A cooler trend will develop by Saturday and little day to day change is expected thereafter. Less than a half inch of rain is expected falling mainly near the end of the period.

ALL "Certified" SEED IS NOT ALIKE

DON'T LET ANYBODY tell you all Certified seed is the same. There IS a difference! A. H. Hoffman Seeds, Inc. is not only the largest producer of "Certified" winter grains in Pennsylvania, but the superior quality of Hoffman "Certified" seeds exceed the state certification standards by a wide margin.

FOR EXAMPLE:

Penna. Certification Requirements for Wheat		A. H. Hoffman's Certified PENNOLL WHEAT (3 year average)
99.00% (minimum)	PURITY	99.75%
1.00% (max.)	INERT MATTER	0.25%
90.00% (min.)	GERMINATION	94.7%
58 lbs. (minimum)	WT. PER BU.	61.5 lbs.

The certification tag is not enough. Hoffman tags on the seed you sow can mean bigger crop profits for you. That fact has been demonstrated over 60 years.

Get complete information and prices on Hoffman Wong BARLEY; Norline OATS, Red Coat, Pennoll, Dual, and Seneca WHEAT, Balboa and Tetra-Petkus RYE.

Contact your Hoffman Seedman or phone TW 8-3421 for delivery to your farm.

LANCASTER POULTRY CENTER

Broilers Down One Cent

Broiler prices dropped more than a cent a pound during the week at the Lancaster Poultry Center. Fourteen lots including 60,900 broilers brought 16.6 to 17 9 for a sale average of 16.9 at the September 27 auction.

The high lot was 1,500 white vantress at nine weeks and two days, consigned by Kenneth Noll and purchased by Martin Brendle.

Two lots of 600 cockerels brought 25.3 and 25 7 while one lot of 1,000 roasters crossed the block at 24 Three lots containing 4,800 leghorn fowl sold at 9.2 to 10 6. All lots on offer were sold.

The complete sale offered and sold 67,300 head in 20 lots. Following is the sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

Eggs are nature's convenience food.. eggs provide on-the-spot meals any time of day and any way yo like them. Eggs are easy and quick to prepare.

● Delmarva

Prices Dip; Demand Light

Delmarva reported prices declined approximately three quarters cent during the 24 hour period ending 10.30 Friday morning A weak and unactive demand met light offerings as several plants were not planning to operate today

Prices at farms ranged 15 7 to 16 45 on 780,800 head during the period.

Estimated slaughter by eastern shore processors for the week end was 453,000 head compared to the 685,000 head last week end.

The Delmarva broiler-feed ratio for the week ending September 21 was 3.8, down one point from the week previous Broilers averaged 17.-87 and mash cost the grower $94 11 per ton.

● Fluid Milk

Supplies High; Demand Good

Pasture conditions continued to improve in most sections as usual fall weather prevailed over most of the country

Supplies were adequate with light surplusses moving to manufacturers

Production increased in the Northeast but demand for bottling quality milk was reported steady as early month increase for back-to-school needs held unchanged.

Wholesale selling price in the New York area was $5.25 per 40 quart unit.

MILLER "I.I.F." kills weevils & fertilizes all in one easy spreading!

Give your forage double protection this Fall. Actual farmer experience has proven conclusively that Miller "I.I.F." controls the destructive alfalfa weevil and spittlebug . . . and produces a sturdy crop, too. Only Miller fertilizer is intimately blended with either powerful Dieldrin or Heptachlor to protect your crop now . . . and give you a greater yield next spring. Miller "I.I.F." must be applied in the Fall, while the alfalfa is dormant and before the adult weevil lays its eggs.

*

insecticide impregnated fertilizer

Important: "I.I.F." with Dieldrin or Heptachlor should be applied after last cutting in fall. Heptachlor should be applied before November 15. For specific timing in your area, consult your local agricultural authority. Do not use treated fields for grazing until after first cutting in spring.

From Where We Stand . . .

Why Didn't My Exhibit Win?

But why didn t my exhibit win?

We hear that refrain every year about this time from some disgusted exhibitors who thought the fair association had hired a colorblind judge with only one eye

'I don t see why my potatoes didn't win They were bigger than any other exhibit on the table, we overheard last week as we looked over the exhibits at a local fair

And it was true We saw the exhibit and the five tubers were far-and-away the biggest specimens in the show

The giant spuds were so outsize that we doubt if you could have sold a hundred pound bag of them to any housewife in the county

That is precisely the reason they did not get first prize In most cases, the fair book will specify that the exhibited produce should be of good market size Even though the big potatoes were free from disease, all of one size and shape, and uniform of color and skin texture, they could not qualify for the top prize because they were not approaching the ideal size

After all, the main purpose of any fair exhibit is to encourage excellence of production and raise the standard of excellence of the product If the judge gives prizes for exhibits which tend to lead producers away from the ideal, the fair has failed in its main purpose

It is a good idea always to read the premium book carefully before entering an exhibit, but after the entry is judged it is even more important to have the facts before passing judgment on the placings All too often the critic has no clear idea of what the judge was looking for in the exhibit.

It is not always bad to question a judge's placings, if you have all the facts at hand, but you must remember one thing — the judge is not above making mistakes, but on the day of the show, he is the boss.

If after the show the fair association feels that the judge deviated too far from the specifications in the premium list, they can select a different judge for the next year.

But if the judge sticks to the guidelines set up, the only thing you can do is understand why your exhibit was not first and prepare a better exhibit next year

Maybe you still won't agree with the judge's decision, but if you understand why he placed the class the way he did, you have learned something, and that, after all, is the purpose for fairs

At least that s how it looks from where we stand

Dairy Programs

A favorite refrain of many urban farm policy "authorities" is to get the government out of agriculture Many farmers, too, argue that the sun would shine perpetually if the government would quit meddling

We are just as anxious as anyone to see our dairy industry on its own feet and running its own business at the earliest possible hour But the simple solution of getting the government out has consequences few people appreciate

What would happen? Over the past few years several projections or estimates have been made by well-qualified economists Depending upon the basic assumptions which were made, projected price drops have ranged from 54 cents to $1 39 per hundredweight for milk A figure recently used by Dr Truman F Graf, of the University of Wisconsin, estimates that milk prices would drop 70 cents per hundred by 1965

The average Hoard's Dairyman subscriber last year sold 352,300 pounds of milk At 70 cents per hundredweight, the estimated decline means a loss in gross income, per subscriber, of $2,466.

We would not deny anyone the right to advocate any type of a farm policy he may desire, but the results of effecting his recommendations should be known

There are those who claim all such projections are made by incompetent people or who try, by other means, to discredit the findings. It is significant, however, that every study we have seen (and all have been made by independent, well-trained economists) projects a very major drop Can they all be wrong? Possibly, but not probably.

The present price support program is a poor one and one which we will not defend. But it has prevented greatly depressed prices. When you're in a leaking boat in the middle of the lake it's rather foolish to abandon the boat until better means of survival are in evidence.

— Hoard's Dairyman.

Devotional Reading Isaiah 40 1 11

Herald of Hope

Lesson for September 30, 1962

HE WAS a strange man, John the Baptizer Strange in many ways His birth was a miracle, and yet in all his life he never performed one single miracle and never tried to He came into this world by a miracle, and yet when he died with his head chopped off, no miracle was there to save him He knew more about Jesus than Jesus' own brothers did, and yet he doubted Jesus in a public sort of way such as his brothers never showed Jesus called him the greatest of men up to his time, yet the world, even the Christian world, pays more honor to many another ancient figure than to John.

Dr. Foreman

In the Desert

People who dress in camel's-hair clothes and eat locusts and wild honey as a regular diet are not common nowadays and they were not in John's day either A man eccentric as he would not get many to listen to him nowadays, but John had a tremendous audience The road from Jerusalem to Jericho was—and still is—a steep winding highway, infested with bandits, yet crowds would walk the fifteen miles or so from the city to where they could hear John preach and be baptized by him No evangelist in America would set up his tent 15 miles from the nearest sizable town, but John did, and the people came. His sermons all could be boiled down to two sentences Repent! He is coming! Considering everything, especially considering the fact that some people thought he must be Christ himself, John must have been a very remarkable character He did not fit any pattern then or now His long stay in the wilderness beginning when he was a boy (for no doubt his aged parents did not live until he grew up) had its influence on him This is good and bad as we shall see

too A desert child, John would not be tied to the conventional, the customary. He had few if any human ties He could look at the world, so to speak, from the sidelines, he had a fully detached view of life On the other hand, because he lived all alone, he did not have the "common touch" that Jesus had Unlike Jesus, John had nothing to say to the sorrowing and suffering of the world Where Jesus saw the multitudes as sheep without a shepherd, John spoke of them as a "brood of vipers"—snakes' babies, to put it in plain English.

In Hope

Yet the people, no matter what John might call them, however fierce his denunciation of them as sinners,—the people swarmed to hear him The reader can think of reasons . and by the way, any one who is interested in John's story should read all the Bible material, not the few printed verses One of the reasons, surely, why John was so popular in spite (you might say) of all his efforts not to be, was that he preached just what the people wanted to hear about the future The people who came to hear him and stayed to be baptized were poor, they were under the crushing heel of a long-staying occupation army.

In Confusion

Jesus indeed came, though as we saw, at first only John knew who he truly was But he was not the kind of "Messiah" or God's-Man John had expected We know that a year or two later, when John was near his death in a dungeon, he, the preacher of hope, began to have doubts He even sent to Jesus to ask if he, John, could be mistaken We do not know whether what Jesus said to him by his messengers comforted him, but we may believe it did, for Jesus always knew the right thing to say So we may feel sure that hope returned to him in the end (Read about it in Luke chap. 7) John is not the first or the last herald of hope who has been right about the hope, but wrong about how the hope comes true. John had thought the Messiah would be an Avenger, a Destroyer; Jesus came a man of peace John looked for something spectacular; Jesus showed him miracles, but the kind he looked for. God has his own ways in his world, and we cannot dictate how he shall manage it. But we may be sure, as John learned, that "Jesus doeth all things well"

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Remove Final Alfalfa Cutting

Several days after a killing frost it is possible to remove the final crop of alfalfa hay without doing much damage to next year's stand This fall with the shortage of hay on many farms this roughage will be quite useful and with good drying conditions it should make good feed With poor drying conditions it might be well to put it into the silo as silage.

To Top-Dress Hay Fields

After the final cutting of altalfa is removed in the fall, it is advised to top-dress the field with three to four hundred pounds per acre of a 0-20-20 or 0-15-30 fertilizer This will help replace the soil elements removed during the year and increase yields next year.

To Spray Legumes For Insect Control

The month of October is recommended for the application of either Heptachlor or Dieldrin on alfalfa or clover fields for the control of spittle bugs and alfalfa weevils next summer Be sure this is done after all harvesting and grazing is done for this year and keep all animals off until the normal harvest season next May or June These fall applications have given excellent results for insect control and all legume producers are urged to adopt the practice.

To Protect Summer Seedings

August seedings of alfalfa and clover are off to a slow start; the growth is very short in many fields and little ground cover is present. If weather conditions prevent good growth before winter weather sets in, some protection may be secured by light applications (5 to 6 ton) of strawy manure during November or early December; be sure the material is spread evenly over the field This cover will conserve moisture and help prevent winter heaving.

Trend in Meat Shopping

More than 300 different cuts of meat adorn the counters of food stores across the nation But this may change in the future One possibility is that the wise variety of cuts might be reduced to a few basic boneless cuts, explains Catherine Love Penn State extension consumer economics specialist In beef, there might be steaks for broiling and pan-frying, oven and pot roasts stewing meat, and hamburger Shopping would be easier, and retailers wouldn't need to carry the extensive inventory they do today

---

Medium sized eggs, milk and dairy products, frozen orange juice plus vegetable fats and oils are currently in plentiful supply and offering economy to the food shopper

Crop Summary

Tobacco Harvest Near Completion

Tobacco harvest continued to near completion this week. A few scattered fields were nipped by frost late last week and the cooler weather slowed growth and ripening of the crops still in the fields.

Seedbed preparation and seeding of fall grains occupied much of the time of Lancaster county farmers this week. Silo filling is still a major farm job, but most corn is ripening slowly and only a few scattered reports of picking corn for grain have been received. Because of the short hay crop and the possibility of frost damage more of the corn crop is going into silage.

For the first time since last April, the Pennsylvania Crop Reporting Service was able to report Tuesday in its weekly crop and weather summary that for the week ending Sept 24 "soil moisture was near adequate for crop needs in most sections of the state."

Even so, parts of the northeast and west central sections still needed rain. Frosts on Sept 21 and 22 nipped corn, tobacco, potato and vegetable crops in many places throughout the state. Damp and cold weather slowed down field work

field work

The latest look at potatoes indicated they are sizing well and are of good quality, although the set is lighter than normal. Many northern tier growers reported they were harvesting a good crop. Wet weather hampered full scale digging. Recurring frosts completed vine kill in Erie County, while in Cambria and some eastern counties chemical vine killer had to be applied.

Apple growers were picking McIntosh, Delicious, Cortland and Jonathan varieties. Apples were small but color and quality were good. Grape harvesting and processing were well under way in Erie County.

Colder weather appeared to be writing an end to fresh vegetable crops. Tomato and sweet corn picking were completed. Some cabbage, broccoli and cauliflower were being harvested.

Boots & Saddles 4-H Horse Club Plans Meetings

By Carol Sites, Reporter

The pavilion located to the rear of the Landisville Fire Company was the location of the monthly meeting of the Boots and Saddles 4-H Light Horse and Pony Club last Friday.

The meeting was conducted by President, Harold Groff. Forthcoming activities were discussed, one of which was the 4-H District Meet held at Ludwig's Corner in Chester County Saturday, September 22nd.

A trail ride will be held October 21st, riding from a wooded area in Mont Joy R D No. 2 to the Roether Stables, Manheim R. D No. 3.

Immediately following the adjournment of the meeting, Mr and Mrs Woodrow Sites entertained the group with slides of their trip to Chief Handprint Farms and the Golden H Ranch in Michigan and of a Quarter Horse Farm at Fairview in Erie County, Pa.

The next meeting of the Club will be held October 12th. The meeting place will be decided at a later date.

Buy A Tractor Win A Trip, Campaign

"Buy a tractor and take a trip."

This slogan keynotes an unusual campaign to sell tractors by Allis-Chalmers farm equipment division that will bring thousands of visitors by airlift to Milwaukee, the company announced today.

All local A-C dealers will participate in the campaign.

Paul Martin, local Company representative in commenting on the campaign said, "It's just as simple as the slogan. All you have to do is to buy a tractor and take a trip, no strings attached."

Purchase of a tractor during the campaign will bring a bonus of a three-day, expense-paid trip of entertainment and sightseeing to the "Land of Power" during early December. The trip will include visits to the company's plants in Milwaukee and Harvey, Ill., called the "Land of Power" by the company.

The Milwaukee visit will include a tour of the 160-acre manufacturing complex, headquarters of the company.

In Harvey, the visit will include the company's new multi-million dollar engine manufacturing facility. A third day of entertainment and sightseeing will be spent in Chicago.

Each participating dealer will make his firm the "Power Task Force" headquarters for his territory, providing extra services during the campaign.

In addition, dealers will aim at a special, intensive demonstration schedule, with a goal of day in day out test drivings of the company's wheel and crawler tractors, both agricultural and industrial. Dealers as well as company salesmen will also be able to qualify for the air trip.

Stop weeds and soil pests in tobacco plant beds

Save work and expense next spring. Treat your plant beds with VAPAM* soil fumigant *now*. It's easy to use, does not require special equipment.

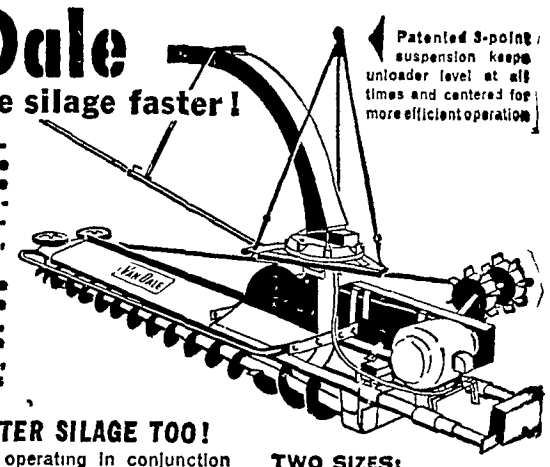
Stauffer Chemical Company

Stauffer CHEMICALS SINCE 1885

Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 18'
Heavy Duty—for silos 12' to 30'

MEMBERS OF THE BERKS COUNTY Poultry Association who toured Lancaster County farms and business establishments Tuesday. Here is the group after their chicken barbecue dinner at the Lancaster Poultry Center. L F. Photo.

Berks County Poultrymen On Tour Here

Thirty two Berks County poultrymen spent the day Tuesday in touring Lancaster County as guests of the local poultry association

After observing the processing of eggs and dressing of poultry at the plant Victor Weaver, New Holland, the group traveled to the poultry farm of Roy Martin, Rothsville, where they saw both broiler and layer operations.

At the farm of Kendig Rohrer, Manheim R1, the group saw a new broiler house with automatic feed handling and automatic watering.

After a barbecue chicken dinner at the Lancaster poultry Center the Berks Countians toured the feed milling operations of Miller and Bushong at Rohrerstown.

Under the direction of Reynolds Minnich, of the Rohrerstown feed firm, the group toured the breeding farm and hatchery of Roy and Jay Grider, Mount Joy. In addition, they saw a controlled environment pullet rearing house where 6,000 replacement pullets are raised.

The tour was conducted by James Haldeman, Berks County Agent, and arranged by Harvey Brown, secretary of the Berks County Poultry Association in cooperation with Hendrick (Henk) Wentink, also of Miller and Bushong.

Guernsey Ass'n Plans Additional Annual Awards

The Lancaster County Guernsey Breeders' Association has announced that they will offer several additional awards at their annual meeting.

James B Lefever secretary of the association said that Guernsey breeders in the county wishing to apply for any of the awards should contact him before October 15 since some of the records are hard to obtain.

In order to qualify for any of the prizes, the dairyman must be an owner of Registered Guernseys The cow under consideration must carry a calf at least 175 days during the record period, and only 305 day DHIA records will be considered.

The awards will be for High Herd Butterfat for herds over 30 and under 30 cows, Lifetime production of both milk and fat of individual cows which have milked during the current year, and the high lactation records completed during the current year for both milk and butterfat These awards will be made to two year olds, three year olds, and cows four years old and over

Application for any of the awards may be made to James B Lefever, Quarryville R3

Get up to a TON more milk per cow...

with PURINA COW CHOW D

America's dairy cows are producing more milk than ever before. And a Purina milking ration, Cow Chow D, is helping many of them make up to a ton more.

Balance of quality ingredients is the secret behind the high efficiency of Purina Cow Chow D.

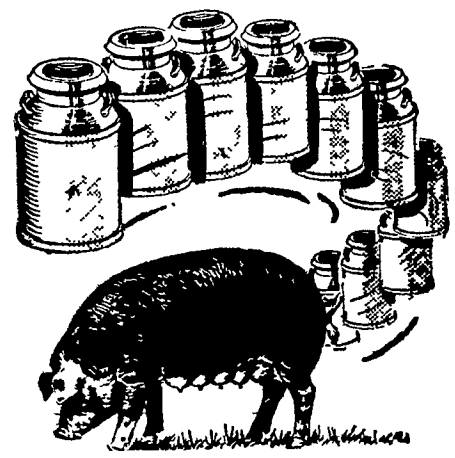
Purina's Research herd of Holsteins and Guernseys has been giving nutritionists factual information on Purina Dairy Rations for over 30 years. This milking string proved the value of Cow Chow D by producing an average of 2067 pounds more milk per cow over that produced on a regular 16% milking ration.

Put Purina Research to work on your farm by feeding Cow Chow D. Chances are, like other Northeastern dairymen, you'll find this ration will help your cows make more milk . . . and more profit.

Do You Know . . . Sows Produce 100 Gallons Of Milk Each Year

A brood sow is a factory — a "pig factory" — and she needs help to produce to capacity. At the Purina Research Farm on the Purina Hog Program, sows each year produce more than 100 gallons of milk; wean 18 pigs; and maintain their own bodies. These are mighty big jobs.

Purina Sow Chow — fed with your grain — is designed and researched especially for these big jobs. Get Sow Chow at our store with the Checkerboard Sign.



Knock out CRD with new Purina Tylan Soluble in chick drinking water.

CUT CRD IN DAY-OLD CHICKS

Now . . . you can help knock out costly CRD infection in day-old chicks with Purina Tylan Soluble. Tylan Soluble contains tylosin, a new, fast-acting antibiotic that cuts down the most common cause of CRD in baby chicks.

When your chicks first arrive, add this powerful Health Aid to their drinking water. We can supply you with Purina Tylan Soluble in economical 100-gram or 2-gram packets.

Beef And Swine Sale At Solanco Is Huge Success

Nine Angus steers sold for an average of $44 per hundred weight last Friday at the Solanco Fair FFA Baby Beef and hog sale Average price of the 32 show hogs was $34 per hundredweight including the champion pen of two which brought top price of $42 50 per cwt.

Joseph Bowman of the Quarryville IGA store bought the top pen of hogs as well as the champion steer which he bid in at $65 per cwt.

The reserve champion pen of two hogs matched the champions' $42½ cents a pound and were purchased by Samuel Hippy, West Willow R1. Hildebrand Meats of Strasburg bought the reserve champion steer for 57½ cents a pound

The champion steer, shown by William Wilson of Quarryville R3, weighed 1,062 while the reserve champion was shown by John Frey Quarryville R2, and weighed 902 pounds. Robert Groff, Peach Bottom showed Chester Whites to the championship while the Berkshires in second place were exhibited by Kenneth Rutt, Quarryville R2

Other buyers in the sale, the first to be held at the show, were Kunzler and Company, Lancaster; Mussers at the Buck, and Walter Dunlap, Lancaster Auctioneers were Everett Kreider and Carl Diller.

STOP - CLEANING... FEED LOSS...!

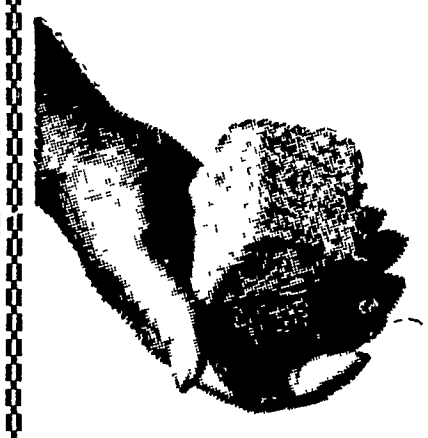
HAY! ALFALFERS* HAY!

WE WANT YOU to know from Feeding Results on YOUR Farm with YOUR Animals that *Lundell Alfalfa Hay Wafers:



- Give up to 31% More feed value, according to University tests, thus 1 Ton of wafers can equal up to 1.3 tons of conventional hay.
- Are preferred by cattle, sheep, horses and brood sows over other forms of hay and even over the finest silage.
- Eliminate waste—Animals can't sort leaves from stems, each mouthful homogenized, eliminates "boss Cows" getting the choice leaves and "timid Souls" what's left.
- Are easily handled mechanically, and because they are compressed, require far less storage space.
- Now available in 20 Ton carloads (In Bulk or in 50 lbs. bags) delivered to your rail freight station. If 20 tons is too much, buy a car with your neighbors."

Importance of Lime on Old and New Pastures

It is nearly impossible to obtain satisfactory improvement of poor pasture land until the acid in the soil is at least partly corrected. Poor pasture soils generally require at least three tons of limestone, which however need not be applied at one time.

Limestone not only increases the pasture grass yield and the quality of the sod, but also increases the percentage of lime in the grass which makes for good bone development and high milk production. The high lime content of the bluegrass soils of Kentucky explain the fine quality of livestock produced there.

It is also evident from Pennsylvania experiments that limestone used in pastureland enables grass and crops to withstand dry periods better.

Here are two urgent reasons to apply limestone to pasture and hay crops:

1. **The grazing season is lengthened both in the spring and fall, thus reducing the days of grain feeding. An abundance of good, low-cost feed is provided even during the hot summer.**
2. **Soil fertility is preserved and improved. Lower cost feed results, and grain feeding, labor and costs are reduced.**

For instance, a dairy farmer who took part in one of the recent "Green Pastures" contests, reports that he improved a 12-acre pasture by using two tons of lime, 1,150 pounds of superphosphate and 11 loads of manure per acre. The 12 acres were divided into three sections and his 21 cows were alternated for 110 days. He reports saving $350 on grain feeding costs and that his herd produced 13,939 pounds more milk than in the similar grazing period the year before.

Steer Feeders—

PROBLEMS ASSOCIATED WITH CATTLE GOING ON FEED

Digestive disorders and a slight transient depression in appetite in newly-arrived cattle in the feedlot have been problems for a number of years. There are numerous causes:

1. **The sudden change in type of feed, for example, from grass and milk to grain, silage and/or hay and a protein supplement.**
2. **Too rapid pushing of grain concentrates.**
3. **Too much protein.**
4. **Not enough roughage.**
5. **Too much high quality roughage.**
6. **Unpalatable feed.**
7. **Too much green chopped legume or grass soilage.**
8. **Feeding soft or immature corn. If not moldy, soft corn is satisfactory, but animals must be accustomed to it gradually (Morrison).**
9. **Too much green chopped corn causing green corn poisoning.**
10. **Too much silage fed to lighter weight calves. Calves do not have the digestive capacity to obtain their total digestible nutrients from a full feed of silage alone.**
11. **Digestive disorders caused by infections.**
12. **In addition, in connection with supplements containing an antibiotic, there is an adjustment of the rumen microflora to the antibiotic. This may cause a slight depression in rumen function and reduce appetite for 24 to 36 hours after the initial feeding. Softer feces also may be noticed. This effect is transient and after 36 to 48 hours the appetite should be restored to normal.**

For a successful and profitable steer feeding program designed to minimize these problems contact any Miller & Bushong Service Representative or call us direct at Lancaster, 392-2145.

"FINEST SERVICE ANYWHERE"

Taller Children Are A Result Of Better Foods

University Park, Pa. — "American farmers are producing some of the best food in the world today," says Dr. R. E. Larson, director, Cooperative Extension Service of the Pennsylvania State University.

This high-quality food contributes to better diets, now one of the big reasons why children are growing taller and sturdier than their parents or their grandparents were at the same age. The good nutrition that brings better health also helps a child reach the full body build that his inherited genes allow him. For example, a nine-year-old boy today averages an inch or more taller than a boy a generation ago.

Another benefit from this high-quality food is the longer life expectancy, Dr. Larson points out. In 1900, life expectancy in this county was about 47 years. Today it's around 70. But in many countries where malnutrition and disease take heavy tolls life expectancy is 35 to 45 years.

"We can look to the striking decline in infant deaths as one of our greatest accomplishments," Dr. Larson states. "Infant mortality in 1961 was about 25 in 1,000. Better nutrition for mothers, plus good medical care, has played an important role.

"With farmers growing higher quality crops and livestock, we're getting more dividends in health from the food we eat," he adds. "But as a nation, our main nutritional fault now is that we're inclined to enjoy too many calories."

Fulton Grange Wins Award In State Contest

Fulton Grande number 66 this week received an honorable mention citation in the annual Pennsylvania State Grange Community Service Contest.

The award will be presented on October 23 at the annual state Grange session in Reading.

The purpose of the contest, said J. Collins McSparran, Master of the Pennsylvania State Grange, is to encourage self-help service programs in both Pennsylvania and the nation. The real achievement of the contest cannot be measured of dollars or man hours spent. It must be thought of in terms of healthier, cleaner communities. The contest amounts to a practical education in good scholarship."

First place in the contest went to Schencksville Grange number 1684 while second place was won by Buckhorn Grange number 1119. A total of 447 Pennsylvania granges participated in the annual contest.

Polled Herefords Presented To Penn State U.

The department of animal industry and nutrition at the Pennsylvania State University has received a gift of 92 pedigreed Polled Hereford cows from Leon Falk, Jr. of Falklands Farms Schellsburg.

These cows, valued at about $50,000 00, were given to the University to establish a beef breeding research program under the direction of Russell C. Miller, head of the department, and Professor Herman R. Purdy, in charge of purebred livestock.

The gift will make possible studies of genetic characters involving both desirable and undersirable traits in beef cattle

According to Dr. Miller, there is a pressing need in present day beef research for such studies in view of the demands for more detailed information on the genetic constitution of beef breeding animals

"Progeny testing has assumed new importance in the beef industry due to the many demands of the breeder the feeder the processor, and the consumer of beef," Miller states

In addition to the gift of cattle the Leon Falk Family Trust, Pittsburgh, has donated $15,000 to initiate this beef breeding program at Penn State.

Farm Women 8 Make Awards To 4-H Girls

Members of Society of Farm Women 8 made awards Saturday to eight 4-H girls for their achievements in sewing, vegetable gardening and flower clubs.

Receiving awards were: Ann Heisey, Linda Eshleman, Janet Frey, Donna Hossler, Kendace Borry, Florence Bixler, Jay Bixler and Virginia Wivell.

Mrs Lewis Bixler, president, had charge of the meeting held at the Maytown Lutheran Church with members of Society 9 as guests The Oct. 20 meeting will take place at the home of Mrs Roy Forney Jr. Florin, with Mrs. Loretta Shank as the guest speaker.

"FINANCIER"

The Pennsylvania State Public School Building Authority acts as "financier" for local school districts who wish to construct and equip new public schools or additions to schools already constructed. The Authority obtains funds for these purposes by selling its bonds to the public.

Goodies From Packaged Cookies

By Mrs. Richard C. Spence

CHOCOLATE NUT FUDGE BARS

1 cup butter or margarine, softened
2 cups sifted confectioners' sugar
2 egg yolks
2 4-ounce bars sweet cooking chocolate
1 cup chopped walnuts
1 teaspoon vanilla extract
2 egg whites, stiffly beaten
20 Chipits, finely rolled

Cream butter and confectioners' sugar until light and fluffy Add egg yolks Melt chocolate over hot water Add melted chocolate, walnuts and vanilla extract to creamed mixture Fold in stiffly beaten egg whites Line an 11 x 7-inch pan with wax paper Sprinkle half cookie crumbs over bottom of lined pan Spread chocolate mixture over top Sprinkle remaining crumbs over top and press lightly into chocolate mixture Chill until ready to serve Makes 20 bars

* * * *

ORANGE PEANUT DELIGHT

1 6-ounce can frozen orange concentrate
1 cup heavy cream whipped
½ teaspoon vanilla extract
1 9-ounce package peanut creme patties
1 cup heavy cream whipped
¼ cup sifted confectioners' sugar
¼ teaspoon vanilla extract
½ cup flaked coconut, lightly toasted

Soften orange concentrate but do not thaw Add to whipped cream and vanilla extract Mix well. In a 9-inch loaf pan put three rows of peanut creme patties Cover with half orange mixture Freeze until partially firm, keeping remaining orange mixture in refrigerator. Put another three rows of patties on top of partially frozen orange mixture. Cover with remaining orange mixture Place last tow rows of patties on top Freeze Allow to stand at room temperature for one minute Run Spatula around sides and turn out onto serving plate. Freeze Whip cream with confectioners' sugar and vanilla extract. Frost dessert. Sprinkle lightly toasted coconut over the cream. Garnish with mandarin orange sections, if desired Makes 9 servings

* * * *

NEAPOLITAN PIE

1 quart pistachio or chocolate chip mint ice cream
15 fig newtons
1 quart vanilla ice cream

Line a 9-inch pie plate with pistachio or chocolate chip mint ice cream Freeze Cut fig newtons into quarters Mix with vanilla ice cream Pile into ice cream 'crust' and freeze Allow to soften slightly at room temperature before serving Serves 6 to 8.

* * * *

GRAHAM CREAM TORTE

1 pint heavy cream
½ cup confectioners' sugar
1 teaspoon rum flavoring
54 graham crackers
2 ripe bananas, very thinly sliced
1 cup chopped walnuts

Whip heavy cream with confectioners' sugar and rum flavoring. Arrange 9 graham crackers in a square on a plate. Spread with a thin layer of whipped cream; top with sliced bananas. Repeat 4 more times Top with another layer of crackers Frost sides and top with remaining cream. Coat sides with chopped nuts, reserving a few for decoration on top Chill about 3 hours. Cut into 9 squares.

* * * *

FROZEN CHOCOLATE DESSERT

1 cup sugar
½ cup butter or margarine
4 eggs
1 square unsweetened chocolate, melted
1 cup finely chopped walnuts
1 cup vanilla wafer crumbs, finely rolled
½ pint heavy cream, whipped

Cream sugar and butter together thoroughly Add eggs one at a time, beating well after each egg Stir in chocolate and walnuts Line an 8-½-inch loaf pan with wax paper Pour in ⅓ of the filling and add a layer of crumbs Repeat both layers twice, freeze Unmold onto serving plate, frost with whipped cream. Return to freezer or serve at once. Makes 6 to 8 servings.

* * * *

DATE BROWNIES

2 eggs
¾ cup brown sugar
½ cup flour
1-⅔ cups graham cracker crumbs (22 crackers)
½ teaspoon vanilla
1-⅓ cups dates, chopped (7-½-ounce package)
½ cup chopped walnuts

Beat eggs until light. Combine sugar, flour and cracker crumbs. Add to eggs, mixing well. Stir in vanilla, dates and walnuts Spread mixture evenly in a greased 8-inch square pan. Bake in moderate oven (350 degrees) 25 to 30 minutes. Cut while warm into 20 bars.

* * * *

BUTTERSCOTCH TORTE

3 egg whites
1-½ cups sifted confectioners' sugar
1-½ cups shortbread cookie crumbs
6-ounce can pecan halves, coarsely chopped
6-ounce package butterscotch chips
1 quart ice cream

Beat egg whites until foamy Add sugar and beat until stiff. Stir in shortbread crumbs, pecans, and ⅔ cup butterscotch chips. Divide mixture into 2 greased, paper lined 8-inch round cake pans. Bake in moderate oven (350 degrees) 20 minutes Cool. Remove from pans Soften ice cream and spread one pint between layers Spoon remaining pint on top layer. Melt remaining butterscotch chips and drizzle over top Freeze. Makes 6 to 8 servings.

* * * *

PEACH FIG BETTY

1 1-pound package fig newtons, crumbled
1-¾ cups (1-pound can) sliced peaches, drained (reserve syrup)
2 tablespoons brown sugar
¼ teaspoon cinnamon
¼ teaspoon nutmeg
¼ teaspoon salt
½ cup peach syrup

Line bottom of 8-inch square pan, or 9x11-½-inch oval casserole with ⅓ of the fig newton crumbs Place ½ of the drained peaches over the crumbs Combine brown sugar and next 3 ingredients. Cover peaches with half the sugar mixture. Sprinkle with ¼ cup of the reserved peach syrup. Repeat layers. Place remaining

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Jane Thurston

Sewing With Laminated Foam Fabrics

Choose a pattern with a minimum of seams, darts, or details.

Pin the pattern pieces to the fabric side.

Use tailor's tacks for making darts and other pattern details.

Baste the entire garment before stitching or make sure the pattern fits properly before cutting The foam will weaken from ripping out seams and stitching again.

Stitch over tissue paper or use a pressure-sensitive tape over the area of the machine likely to catch in the foam.

Use a fine to medium needle and about ten stitches to the inch.

THURSTON

Hem through the entire fabric because the foam alone won't hold the threads

Some Basic Safety Rules

Keep scissors, knives, and other pointed or sharp tools in a safe place

Teach children to play in safe places, keep them off the streets and highways

Remove the locks from all discarded or unused refrigerators.

Disconnect electric heating appliances when not in use, and keep all electric outlets covered when not in use.

Never wear dangling sleeves when working near the range or other open flame.

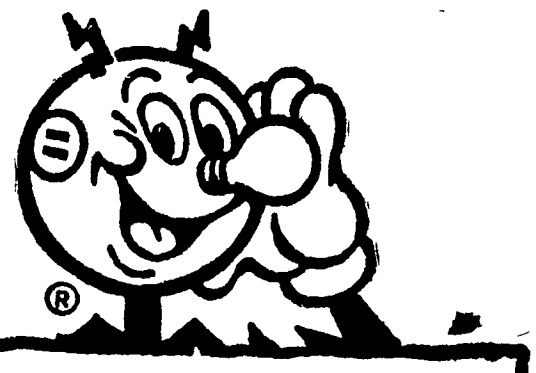
Be sure window screens are fastened securely.

(Continued on Page 20)

NOW! You get a MONEY-BACK GUARANTEE

of satisfaction when you buy a "family-size"

FLAMELESS ELECTRIC WATER HEATER



FLASH!

PP&L has filed a new electric rate with the Public Utility Commission to substantially increase the number of kilowatt-hours available at the special 1¢ rate for most sizes of Flameless electric water heaters. The new rate, proposed to become effective November 1, will give you a "family-sized" 640 KWH bimonthly at 1¢ per KWH on 30-thru 82-gallon electric water heaters.

For six months from the date of installation, PP&L's guarantee covers:

- Complete satisfaction with performance
- Complete satisfaction with cost of operation

The guarantee applies to 40-gallon or larger, quick-recovery electric water heaters or 80-gallon water heaters with standard NEMA wattage units. And, you get a family-size supply of hot water 24 hours a day at PP&L's special low, family-size water heating rate of 1¢ per kwh.

See your electric APPLIANCE DEALER or PLUMBER today! Offer good only from September 17, 1962, through October 27, 1962.

Best Food Buys

Changeover To Fall Vegetables

Fall in officially here and the changeover from Summer to Fall vegetables will increase greatly in the next two weeks. Tender vegetables are affected most, observes Tom Piper, Penn State Extension Marketing Agent, who reports that light frosts in some areas have already terminated local production of certain items

Cabbage, cauliflower, celery, eggplant, endive-escarole, and other Leafy greens such as spinach are currently in heavy supply. Harvesting of potatoes, onions and sweet potatoes has progressed with ideal weather conditions; these commodities are in plentiful supply and at the year's lowest prices.

Several other vegetables remain in plentiful supply but often lower in quality than in past weeks. Lettuce, sweet corn, tomatoes and cucumbers should be inspected for quality at point of purchase.

Signs of Autumn are appearing in the form of pumpkins, various winter squash, ornamental gourds and Indian corn The season's first sweet apple cider is available too.

Numerous good buys exist at the fruit counter. Select from several varieties of apples suitable for cooking or eating fresh. Bartlett pears, red and white grapes and Western melons including Casaba, Crenshaw, Honeydew and Persian varieties are plentiful now. New crop Florida grapefruit are starting to market but opening prices will be high.

Survey sources report meat supplies about normal. Pork, lamb and hindquarter beef cuts are quoting lower at wholesale. Consumers can expect some smoothing of the jagged price peaks of the past few weeks, although change will be slight.

Turkeys, broiler-fryers and seafood top the list of meat values this week-end Beef pot roast, steaks, and rib roast will appear as featured items in some foodmarket ads; pork steaks and smoked picnics are likewise candidates for promotion.

Meats Take One Quarter Of Food Dollar

The Nation's meat industry is the largest food business in the world, says Mrs. Sandra M. Eaton, associate extension home economist, Chester County.

Americans spent $16 billion for beef, pork, veal, and lamb in 1961. That's about one-fourth of all moneyspent for food during the year, and averages about $277 for each family.

Despite rising costs meat is still o good buy, she points out In the early 1920's, the annual meat bill amounted to about $34 for each person and bought 134 pounds of meat By 1961, the meat bill, at about $90 for each person, was almost three times as high, and bought 161 pounds of meat

Even more important to the family budget is that only 4 5 per cent of the take-home pay was needed to buy meat in 1961 Forty years ago the meat bill required 6 7 per cent of the take-home pay.

The percentage of income spent on meat declined because incomes are higher than they were four decades ago Also, today's farmer can raise more hogs, beef cattle; and sheep with considerably less time and labor Better farm management, greater use of machinery, and improved foods help the farmer to produce more meat for consumers a a reasonable price

● Have You Heard?

(continued from page 15)

Look carefully when backing your car from the garage or driveway

Dispose of all trash rubbish, discarded furniture, papers, and worn-out appliances

Why Have Press Cloths

The main purpose of a press cloth is to protect fabrics from direct heat of the iron and provide needed moisture for some fabrics

You need press cloths when pressing details on the right side of garments made from some fabrics

A good press cloth is smooth seamless lintless and free from sizing Choose wool cheesecloth, muslin drill or a commercial cloth A good all-purpose press cloth is a square yard of fine quality cheesecloth used single or double

This An That

Lighting experts remind us not to use lighted valances in rooms with low ceilings Instead use lighted wall-to-wall cornice mounted at the ceiling This makes the ceiling appear higher.

Enhance your savory dinner stew with a topping of perky parsley pinwheels Roll out biscuit dough to a rectangle. brush dough with melted butter sprinkle with chopped parsley roll like jelly roll, and cut into slices Place slices cut side up on top of hot stew and bake until crusty brown

A recent survey that had to do with breakfast foods and habits reveals that a man who eats a satisfying breakfast is likely to be a man successful in his work and attached to his home and family With these facts in mind why not try to make breakfasts in your home more appetizing and more appealing' Homemade muffings will be a special treat and you'll find other hot breads lend variety and interest to this first meal of the day.

Six Winners To State 4-H Horse Show

Six members of Lancaster County's two 4-H Light horse and pony clubs won the right to ride in nine classes in state competition at the district show last Saturday.

The show at Ludwig's Corners, Chester County, was an elimination for the state competition November 5 in Harrisburg during the Pennsylvania Livestock Exposition. First and second place winners in district competition will be eligible to enter the state finals.

Miss Barbara Shoemaker, daughter of Mr. and Mrs. Bus Shoemaker, Quarryville R2, was top county winner with three first place ribbons. The fifteen year old horsewoman was champion in the pole bending, western reining and clover leaf race classes. She also won a third ribbon in a Western Pleasure class.

Michael Shoemaker, Barbara's brother, and Gerald Wagner, also of Quarryville R2, were the only other countians to win first place ribbons. Second place winners who will be eligible for state competition include Fred Shaub, Quarryville R2, Mary Anna Brinkley, Quarryville R3, and Harold Groff, Manheim R2.

Co. Dairymen Win Ribbons In State Show

Local breeders of Holstein cattle won six placings in the state Black and White show last week at the Farm Show building in Harrisburg

The only first place award coming to the county was in a dam-daughter class which was won by Herbert and Rhelda Royer, 2025 Oregon Pike, Lancaster.

Melvin Peifer, Willow Street won a sixth place ribbon in the junior heifer calf class. In the junior yearling heifer class J. Mowery Frey, Jr., 1717 Hans Herr Drive, Lancaster took a third place ribbon, and Robert E. Pepple, Oxford R1, brought home a seventh award.

J. Robert Hess, Strasburg R1, won a third award with a two year old heifer (never fresh), while Averril Lindell Royer, 2025 Oregon Pike, won fifth with her two year old heifer.

Grand champion female was the aged cow of Paul and Lucille Fissel of Biglerville. An aged bull won the championship for Howard Weiss of Myerstown.

Winter Wheat

Redcoat, Pennoll, Seneca and Dual are the recommended winter wheat varieties for Penna., says Elmer C. Pifer, Penn State extension agronomist.
